## Key Advantages

- Provides your management team with a rapid “top down-big picture” of your current security posture.
- Proactively identify possible or potential security risks, or vulnerabilities, that may allow access to confidential areas of a network or obtain information from your network.
- Provides both short term tactical remediation strategies and long term strategic roadmaps which enhance Business Resiliency.

## Key Deliverables

- Executive summary, including a high-level summary of the analysis and findings and a prioritized action plan for remediation.
- Assessment of the security measures currently in place compared with industry practices.
- Analysis table of security issues found, identifying and classifying level of effort to exploit, estimated business impact and recommendation for remediation.
- Prioritized list of recommendations intended to enhance security and reduce risk

Proficio provides high quality Cyber Defense Services designed to help you minimize risk, improve operational efficiency, and satisfy regulatory mandates. We will provide your organization with the metrics needed to make critical business decisions on where to spend valuable time and money protecting your IT Assets while maintaining industry best practices and regulatory compliance.

## Security program Development

Our most popular service, provides your organization with a comprehensive cyber security management strategy from start to finish. In addition to providing a dedicated information security leader to act as your Chief Information Security Officer (CISO), Proficio will equip your organization with a team of industry professionals with common roles such Security Architect and Security Analyst. Our experienced team will work with your organization's leaders to implement a cost-effective strategy based on your company's needs.

We'll do the following:

- Complete a cyber security analysis of and identify vulnerabilities
- Execute a regulatory/compliance risk assessment for your business
- Develop and operationalize company-specific cyber security policies and SOPs
- Facilitate security awareness training programs for staff, management, and/or the executive team
- Provide guidance to senior management for prioritizing security initiatives based on budget and risk level
- Participate in the recommendation, evaluation, and selection of security products and technologies
- Develop and operationalize procedures for risk management, vulnerability management, and incident management
- Assess ongoing performance of security initiatives
- Meet on or off-site with your team to offer security leadership, credibility, guidance, and audit support
- Ensure that your organization has the ability

## Cyber Security Leadership (vCISO)

We provide your organization with a dedicated cyber security leader who integrates into your team and acts as a Chief Information Security Officer (CISO). Proficio will be available both on-site and remotely per your organization's needs.

Proficio can provide leadership and guidance to your executive management team for any of the following cyber security related initiatives:

- Security compliance management
- Security architecture consulting
- Incident management
- Policy, process, and procedure development
- Security training and awareness
- Security assessment
- Risk management
- Vulnerability management
