

Splunk Enterprise Security Services

Proficio's managed services for Splunk Enterprise Security provide co-management of your on-premise or cloud-based Splunk Enterprise Security instance to help ensure continuous log collection and optimal performance of your Splunk investment.

By partnering with Proficio, you have a team of Splunk experts on your side. With Proficio monitoring your system, the burden is removed from your internal resources and you can be confident that your system is always up to date with the latest releases and working optimally.

Quick Facts

- Avoid alert fatigue, receive only validated alerts with remediation recommendations
- Free up your internal team with Proficio's experts maintaining your Splunk instance
- Leverage Proficio's extensive use case library to catch credible threats
- Run searches on a staggered schedule to keep your system running at optimal levels
- Strengthen investigations with enhanced dashboards and drill-down capabilities

Splunk Enterprise Security Event Monitoring and Alerting

Proficio's Security Event Monitoring and Alerting for Splunk provides 24x7 detection and response services from expert SOC Analysts and investigation of threats discovered through your on-premise Splunk or Splunk Cloud instance. Proficio's global Security Operations Center staff continuously monitors security events, confirms and triages actionable alerts, and perform orchestrated escalation or incident response services.

Splunk Security Event Monitoring & Alerting Advantages

Proficio's SOC Analysts remove the burden from your security team by reviewing alerts received and taking appropriate action; your team only receives validated alerts and is provided with actionable insights so that they can quickly respond to real threats.

24x7 security event monitoring and alerting

Library of highly advanced and proven use cases, optimized for quicker and more accurate results

Rapid detection and investigation of threats

Accurate alerts with data enrichment and recommended actions

Enhanced dashboards to aid in investigations

Team of experienced SOC Analysts always on-call

Splunk Enterprise Security Administrative Services

Proficio's managed services for Splunk allow you to focus on getting results from your security tools investment instead of continuously troubleshooting, tuning and monitoring your tool for health and performance. Let Proficio's Splunk experts manage your SIEM, freeing up you and your team to focus on other tasks.

Splunk Managed Services Advantages

- Splunk experts for system administration
- On-going system upgrades
- Performance tuning and maintenance
- Splunk infrastructure monitoring and resolution
- Continuous monitoring of log collection and forwarders
- Extended troubleshooting and issue resolution
- Experts on-call for additional service needs or content creation
